Animal Health Requirements For Admission to New York State and County Fairs (Part 351 of NYS Agriculture and Markets Regulations) NYS Department of Agriculture and Markets/Division of Animal Industry 10B Airline Drive, Albany, NY 12235 518-457-3502 [Fairs | Agriculture and Markets \(ny.gov\)](#)

Certificates of Veterinary Inspection (CVI)

- Cattle, sheep, goats, swine, llamas, alpacas, deer, and misc. ruminants require a valid **paper** CVI to enter the fairgrounds.
- The CVI must be issued by a Category 2 accredited veterinarian.
- All animals must be officially identified. ALL MANMADE ID MUST BE RECORDED. Refer to Animal Identification section below for more information.
- Only one species is allowed per certificate.
- The type and duration of certificate required depends on the origin of the livestock.

New York Origin Livestock:

- A valid intrastate CVI (AI-61) is required.
- Each animal must be individually identified on the CVI (see below).
- The CVI must be issued on or after May 1 of the current year.

Out of State Origin Livestock:

- All animals entering New York State must satisfy import health and test requirements for that species and be accompanied by a valid interstate CVI.
- The interstate CVI is valid for 30 days from the date of CVI inspection. During the fair season (July 1 through Labor Day) valid CVI's can be used multiple times for entrance into fairs. The initial entrance into a NY fair must be within 30 days of the date of CVI inspection. In order for the CVI to be used for a later fair, it must be dated and initialed by a NY state official noting the location of the initial fair. A change in health status or eligibility of an animal necessitates the generation of a new CVI

Animal Identification

- ALL MANMADE ID MUST BE RECORDED
- Cattle must be identified by an official USDA approved eartag. Radio frequency identification (RFID) eartags, commonly referred to as "840 RFID tags," are required.

Rabies Vaccination

- Rabies vaccination is required for all species for which there is a USDA licensed vaccine available (cattle, horses, sheep, dog, cat, ferret) and that are 4 months of age or older on the date of admission to the fair.
 - For most rabies vaccines, the earliest age allowable for primary vaccination is 3 months. Animals that are vaccinated prior to 3 months of age will need to be re-vaccinated according to label before entering the fairgrounds.
 - Vaccine must have been administered within the past 12 months. The exception is Imrab LA vaccine used in sheep which protects for 3 years after the second annual vaccination (consult your veterinarian).
- The rabies vaccination requirement must be met on the day of admission even if the animal was previously admitted to a fair when too young to vaccinate

BVD-PI Testing

- All cattle, llamas and alpacas exhibited at NY county fairs or the State Fair must be negative to an approved test appropriate to detect Bovine Viral Diarrhea persistent infection (BVD-PI). The testing veterinarian is responsible to make sure the proper test is conducted. This is a once in a lifetime test that must be reported on the required certificate of veterinary inspection. The issuing veterinarian is responsible for verifying the validity of the test, the identification of the animal and recording the test date on the CVI. If a previous test is not verifiable the test must be repeated.
